

# Climate Action in Language Education

**A FREE online course series starting on 28 April 2021**

**Climate Action in Language Education** is a professional development course series designed to train English language teachers how to integrate environmental issues into English language teaching, equip learners with the language skills to understand, discuss and engage critically with climate change issues, and make a meaningful difference.

There are **three modules**, with a total of **nine hours** of learning.

This free and flexible course allows you to choose the modules that are most relevant to you.

All three modules include comprehensive resources, videos, Q&A sessions and practical examples.

By the end of the modules, you will be able to:

- integrate climate change issues into your teaching practice as part of your current curriculum, creating engaging lessons which are relevant to your students' needs and interests
- understand and use climate change terms and concepts relevant to your teaching context with confidence
- go beyond traditional coursebook environment units and embed environmental sustainability throughout your teaching
- design, manage and evaluate projects, through which your students can use climate related language and participate in community action aimed at tackling the climate crisis.
